SEARCH FOR MISSILE-RELATED ACTIVITY,  
KAMCHATKA PENINSULA, USSR

25X1D

25X1D

• A special evaluation of [REDACTED]

[REDACTED] was made for the purpose of negating or confirming missile or related electronic activity. The small scale and obliqueness of the photography, as well as snow cover limited conclusive evaluation. The only area where it was possible to determine that there was no missile/electronics activity was a small area along the northern coast of Poluostrov Ozerney, shown in Figure 1. The only electronics activity noted was the Uka tracking station.

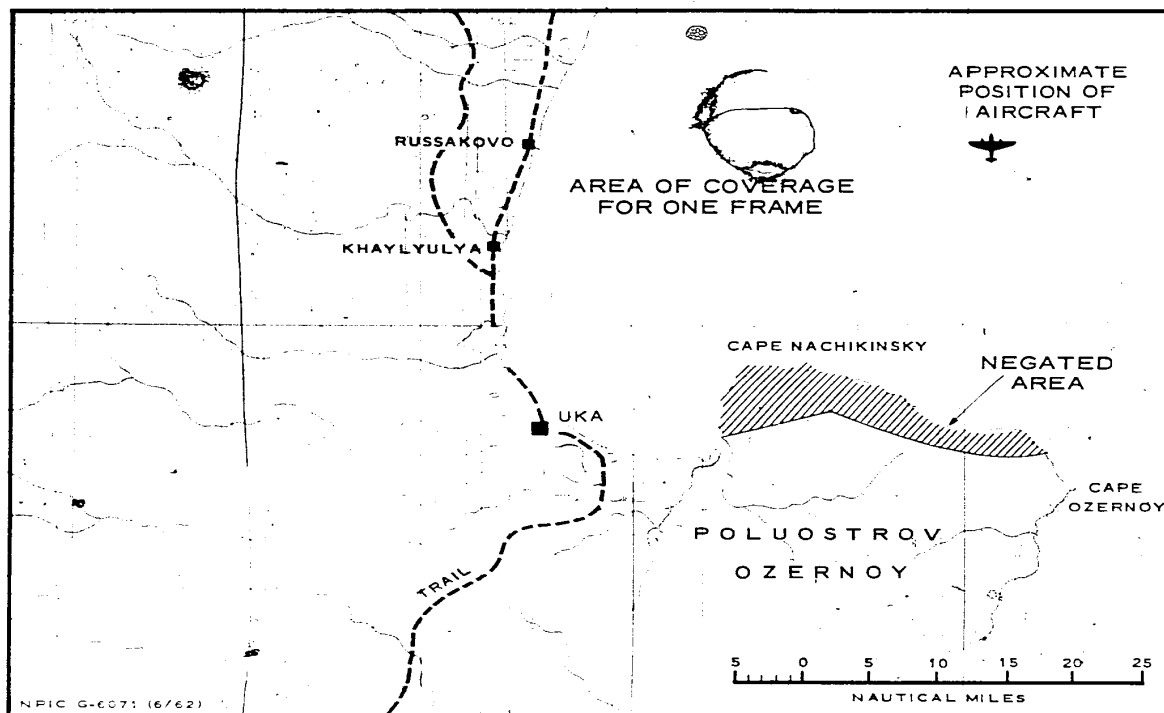

FIGURE 1. POLUOSTROV OZERNOY AND UKA AREAS OF THE KAMCHATKA PENINSULA.
